SEQ ID NO: 1 or an analyte thereof related to said disease state; and

means for determining binding between said biochemical material and said biomolecule;

whereby at least one analysis to determine a presence of a marker, analyte thereof, or a

biochemical material specific thereto, is carried out on a sample.

- 25. The kit of claim 18, wherein said marker includes the sequence identified as SEQ ID NO: 1 or at least one analyte thereof and said biochemical material is at least one monoclonal antibody specific therefore.
- 29. Polyclonal antibodies produced against the marker having a sequence identified as SEQ ID NO: 1in at least one animal host.
- 30. An antibody that specifically binds a biopolymer including the marker having a sequence identified as SEQ ID NO: 1 or at least one analyte thereof.
- 33. A process for identifying therapeutic avenues related to a disease state comprising: conducting an analysis as provided by the kit of claim 18; and interacting with a biopolymer including the sequence identified as SEQ ID NO: 1 or at least one analyte thereof;

whereby therapeutic avenues are developed.

34. The process for identifying therapeutic avenues related to a disease state in
